

ESPHONEY ONDICHU NYAIGOTI

Full-Stack Web Developer | React · TypeScript · Node.js · PostgreSQL

eaphoney@gmail.com · +254 115 529 179 · Nairobi, Kenya · github.com/SCIPIO666 · <https://scipioportfolio-two.vercel.app/>

PROFESSIONAL SUMMARY

Full-stack developer with proven production experience shipping and deploying real systems . Comfortable across the stack — React/TypeScript frontends, Node.js/Express REST APIs, PostgreSQL with Prisma — and equally comfortable going deep on interaction design: scroll-driven GSAP timelines, React Three Fiber 3D scenes, and Lenis-smoothed motion, most recently applied to build a fully custom animated portfolio from scratch. Fast learner, clean code, problem-first mindset.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3

Animation & 3D: GSAP, Framer Motion, Three.js / React Three Fiber, Lenis

Backend: Node.js, Express, Prisma ORM, PostgreSQL, SQL, REST API design

Tools & Deployment: Git, GitHub, Vite, Figma, Vercel, Render

EXPERIENCE

Full-Stack Developer — Zama Systems

2024 – Present

- Shipped several projects including an online learning platform, laptops e-commerce store, beauty products e-commerce store, car hire online booking service and a website for a charity organization.
- Gained hands on skills shipping end to end projects starting with design, developing, testing, deploying and debugging production grade projects.
- Stack: React · Node.js · Express · PostgreSQL · Tailwind CSS · REST APIs · Git

PROJECTS

Interactive Portfolio — Scroll-Driven 3D Experience (<https://scipioportfolio-two.vercel.app/>)

2026

- Built an animation heavy portfolio driven by GSAP ScrollTrigger with timeline synced to Lenis smooth scroll.
- Engineered a responsive animation system using GSAP matchMedia to run an entirely different, simpler sequence on mobile without duplicating logic.
- Stack: React, Three.js (R3F), GSAP, Lenis, Framer Motion, Tailwind CSS, Vite, Zustand

AICN Online Training Platform (https://github.com/SCIPIO666/AICN_PLATFORM)

2026

- Architected and shipped a full-stack training and certification platform to production on Render, diagnosing and fixing real deployment blockers — hardcoded CORS, a localhost-bound server, relative API base URLs — that most tutorials never cover.
- Built an automated certificate pipeline with Puppeteer: dynamic PDF generation, QR-code verification, and automated email delivery.
- Resolved production-only bugs invisible in local dev — Linux case-sensitive import paths, a silently broken Axios response chain, disabled routes — through a systematic frontend audit.
- Stack: React, Node.js, Express, PostgreSQL, Puppeteer, Render, Zustand, Axios , Swagger , Pinno , Playwright ,React Hook Form , Tansatck , Jest ,Node Mailer , PrismaORM

EDUCATION

Full-Stack JavaScript Engineering — Self-directed

2024 – Present

Html, Css, JavaScript, React, Node.js, Express, PostgreSQL, Prisma, GSAP/Three.js, System Design

Diploma in Medical Laboratory Technology (DMLT) — Credit

2018 – 2021

Kabete National Polytechnic
